Being informed about health risks and conditions may help you take steps to lower your risk of disease. If you have a medical condition, learning more about the condition and available treatments may help you be more proactive in discussions with your doctor about which treatment choices best meet your needs.

Health Information—provided by WebMD

Browse through credible information about more than 150 medical conditions and wellness topics—available to HealthFlex participants through WebMD, an industry-leading provider of health content. After you log into the HealthFlex/WebMD website and reach the WebMD home page, click on “**Health Topics**” at the top of the page.

HealthQuotient (HQ)—provided by WebMD

Get started on the path toward managing health risks and preventing chronic disease by taking WebMD's HealthQuotient (HQ). The HQ is an online health questionnaire that connects you to other important health tools offered through HealthFlex—including free, confidential health coaching if you qualify based on your health profile. The HQ is a great first step toward assessing your health and wellness needs and improving your overall health. Be sure to take the HQ during the incentive period—August 1 to September 30—to avoid a higher medical plan deductible the following year.

Virgin Pulse

Being physically active promotes good health, relieves stress and helps you re-energize. The Virgin Pulse physical activity/walking program offers a financial incentive for activities such as walking, running, dancing and

golfing. The more you move while wearing your Virgin Pulse activity tracker, the more rewards you will accrue that can be redeemed for retailer gift cards or deposited into your bank account.

Learn more about the program online; from wespath.org, select “**Center for Health**” and browse “**Services and Programs**.” To enroll, log into the HealthFlex/WebMD website and click on “**Join Virgin Pulse**.”

Health Coaching—provided by WebMD

Participants and spouses covered by HealthFlex can receive one-on-one, confidential support from a personal health coach. Health coaching helps individuals adopt healthy lifestyle habits that may reduce their risk of disease in the future. Coaching is tailored to the individual’s health profile and priorities, and often addresses common risk factors, including: high cholesterol, high blood pressure, weight management, incomplete nutrition and sedentary lifestyle. The program’s “whole person” approach means health coaches address individuals’ overall well-being—rather than only specific risk factors. Health coaching is provided over the phone at no extra cost to you—and is completely confidential. WebMD’s health coaches include registered dietitians, exercise physiologists and other qualified health professionals.

Start by taking the HealthQuotient health risk assessment on the HealthFlex/WebMD website to see if you are eligible for coaching. For more information about health coaching, call WebMD at **1-866-302-5742**.

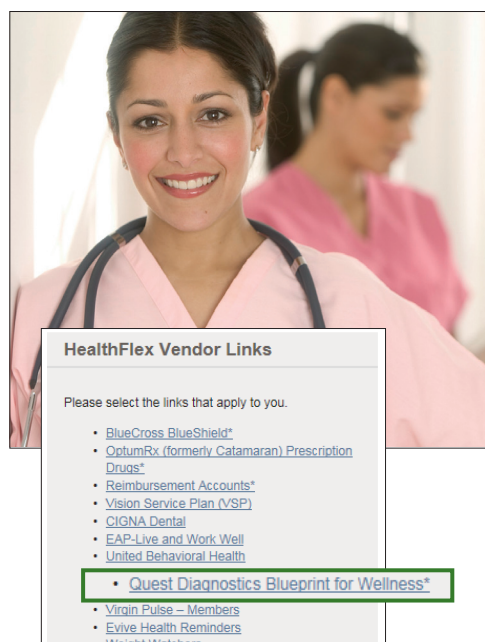

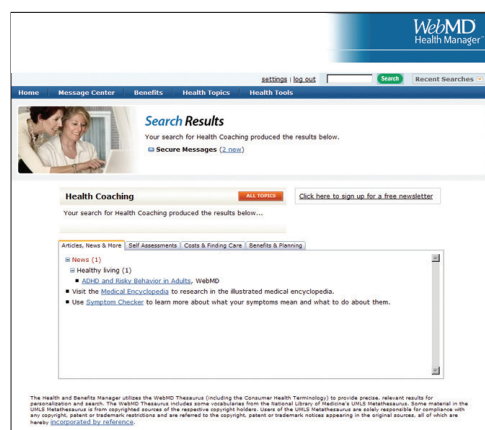

Blueprint for Wellness Biometric Screening

The Blueprint for Wellness biometric screening by Quest Diagnostics involves a blood draw followed by lab analysis. The screening includes tests for common health risks, such as:

- Cholesterol, lipid, blood sugar and diabetes screening;
- Tests for liver, kidney, thyroid, and other organs and body systems; and
- Measurement of blood pressure, height, weight and waist circumference (if taken at a plan sponsor event or at most local Quest laboratories).

The screening provides a snapshot of your current health measurements to share with your doctor and to help shape your personal health and wellness goals.

Screenings can be taken at local Quest Diagnostics laboratories (pre-registration required) or at an onsite event hosted by your plan sponsor—typically Annual Conference or an employee health event (pre-registration recommended). Pre-registration can be done by phone at **1-855-623-9355** or online by selecting “**Quest Diagnostics Blueprint for Wellness**” under the “**HealthFlex Vendor Links**” menu after logging into the HealthFlex/WebMD portal. No additional username/password is required.
